Re: MB Docket no. 04-232
7-21-04

I have been with this radio station for 35 years and NEVER have we had a complaint based on obscene, indecent or profane broadcast programming.

To require us to retain recordings for even a limited period of time would be a hardship on a station our size. We are very limited with funding and while a big market station may be OK with spending hundreds or thousands of dollars on this recording equipment, it would provide a hardship for small market stations like ourselves throughout the country.

We don't believe in the sometimes vulgar programming that some bigger stations use that would require this recording procedure. In small town radio, we are here to serve the public, which our public file shows!

Thank you for your time.
